Part 1: Brainstorming

1. What is the name of your app idea?
   My app idea's name is "Job Buddy"

2. Who is your app designed to help or support?
   My app is designed to help young people with choosing their future job.

3. What specific problem does your app solve?
   My app helps solve the issue of people being worried or confused because they don't know what they want to do as their job.

4. Why is this problem important to you or your community?
   This problem is important to me because I also struggle with knowing what job I want to do in the future.

Part 2: App Concept

5. Describe how your app will work. (What will users be able to do?)

   Users will be able to answer basic questions about their personality and interests and get recommended what jobs might interest them based on that.

6. List at least **two main features** your app will have:

   - Feature 1: Different screens with personality based questions

- Feature 2: Different screens showing job ideas based on your answers to the personality based questions

7. How will your app demonstrate **empathy** (understanding and caring for others' needs)?

   My app demonstrates empathy by helping others figure out what they want to do in the future, making them a little less anxious about their future.

Part 3: Inspiration

8. What idea or message from the video will you use in your project?
   The idea from the video that I will use in my project is the idea that you should choose things based on your personality to ensure you enjoy it.

Part 4: Reflection

10. What makes your app idea unique and meaningful?

My app idea is unique and meaningful because: My app is unique because it provides options for future jobs that users can look into. It is meaningful because there have been many people who struggle with choosing their future occupations, such as myself, because they can't find a job that interests them. My app helps show them that there are options for them that may interest them.
